Glossary of Terms

HEATING DEGREE DAY (HDD) - A measure of how cold the period was with reference to a standard daily mean temperature of 65 degrees. The number of HDDs is calculated by subtracting the average outside temperature from the standard. (i.e. 45 degrees = 20 HDDs) Total HDDs is the sum of the daily heating degree days in the billing period.

CONSUMPTION - The total Mlbs of steam used in the period. An Mlb equals 1,000 pounds of steam. Consumption is calculated by multiplying the difference in meter readings by the meter constant and a pressure correction factor.

MEASURED AND BILLED DEMAND - Demand is a measurement of the rate of steam used, in pounds per hour. It may be viewed as a service charge for the amount of equipment the Company must have available in order to maintain steam pressure(s) throughout the system and satisfy the total demand of all customers. Demand is charged from October 1st through May 31st, in accordance with the Company Steam Tariff, and is the highest of the following three values: 1) Actual measured demand - Load in pounds of steam per hour, occurring during the single hour of greatest use during the billing period 2) The Ratchet - 90% of the greatest recorded demand during the preceding seven heating season months or 3) Contracted minimum demand.

STATE TAX ADJUSTMENT SURCHARGE (STAS) - The Public Utility Commission (PUC) allows public utilities to collect from, or refund to, its customers, changes in certain taxes. The STAS covers capital stock tax, public utility realty tax and state corporate net income tax. It is calculated by multiplying the consumption and demand charges on your steam bill, adjusted for steam cost rate revenues (SCR), times the STAS rate. The STAS rate is subject to state-legislated changes in taxes imposed on public utilities and may change from time to time.

STEAM COST RATE (SCR) - The bill you have received this month includes a "Fuel Charges" component that is approved annually by the Pennsylvania Public Utility Commission (PAPUC) to reflect certain variable costs incurred when producing steam. The last annual change was approved by the PAPUC at Docket No. M-2016-2554204 on August 17, 2016, effective September 1, 2016, subject to monthly adjustment to reflect the actual cost of fuel of each prior month, as provided in the Company's SCR Rider.

Notes

If you have any questions or complaints concerning this bill, please contact your account representative, Helen Silvis at (215) 875-6900, Ext. 5811 prior to the indicated due date.

A rate schedule, an explanation of how to verify the accuracy of your bill, an explanation of various charges, if applicable, as well as the complete tariff, is available in our office at 2600 Christian Street, Philadelphia, PA for your inspection during our normal business day (Monday through Friday, 8:00 a.m. to 5:00 p.m.). You may also file comments or complaints about your rates with the Pennsylvania Public Utility Commission. You can send a letter or request for a formal complaint form addressed to the Pennsylvania Public Utility Commission, PO Box 3265, Harrisburg, PA 17105-3265.

All past due balances are subject to a 2% finance charge per month.
