

Request for Proposals for Solar Installation Vendors for Solarize Philly

Responses to Questions Received as of April 12, 2019

Regarding PV modules:

1. What is the total purchase volume [kW/MW/pcs]?

PEA has set a goal to double the number of contracts signed before the end of 2019, targeting at least 400 contracts in Phase 3. The average project size was about 5 kW in the first two phases.

2. What is the delivery schedule within the 12-month period (bi-monthly, monthly, etc.)?

The delivery schedule would be arranged directly with the pre-approved installers.

3. Is there a preference for country of origin?

We have had customers express a preference for modules manufactured in the United States. You are encouraged to submit multiple module options with different countries of origin and price points.

4. Is there a preference for wattage range, dimensions (60 vs 72), and/or tech (mono vs poly)?

No. Please propose module options that you believe will provide the best quality and value for Solarize Philly participants.

Regarding inverters and MLPE devices:

1. What is the total purchase volume [kW/MW/pcs]?

PEA has set a goal to double the number of contracts signed before the end of 2019, targeting at least 400 contracts in Phase 3. The average project size was about 5 kW in the first two phases.

2. What is the delivery schedule within the 12-month period (bi-monthly, monthly, etc.)?

The delivery schedule would be arranged directly with the pre-approved installers.
