Enroll Now in Pennsylvania's First Solar CTE Program

Frankford High School will launch the new Bright Solar Futures program in fall 2020, starting with the first class of 10th grade students. This training is a 3-year CTE program that will prepare students for jobs in the solar industry.

The Bright Solar Futures Program includes:

- Hands-on training in solar, energy efficiency and electricity basics
- Recognized Industry credentials
- Paid Summer Internship opportunities

To be part of the class, you must be enrolled as a 10th grade student at Frankford High School in Fall 2020.

If a student is interested who is not already enrolled at Frankford, they will need to transfer schools through the School District's Office of Student Enrollment. To learn more, contact Joe Wilson, jwilson@philaenergy.org, 215-686-4483.
